Case Study Part 2. The case described in the case study is a cardiovascular case. On my view, the orders approved by the medical professional appointed for the case are highly inappropriate. It is important to consider that the reactions from the drugs taken by the patient are potential sources of the patient's complaints.

The spinal cord is composed of

Access PDF Case Study Answers For Anatomy And Physiology

segments, as indicated by the 31 pairs of spinal nerves. Each segment has numerous dorsal (posterior) and ventral (anterior) rootlets that arise from the respective surfaces of the spinal cord (). Dorsal rootlets contain neuronal processes that conduct afferent impulses to the spinal cord, whereas the ventral rootlets conduct efferent impulses from the spinal cord.
